**You are about to purchase a product that is not simple and may be difficult to understand.**

### What is this product?

**Type:** The product is a limited partner's interest in the Fund.

**Term:** At least 10 years and 6 months from the date of the first closing of the Fund plus an extension option of two times one year. The Fund is a so-called closed-end fund. This means that the interests cannot be returned or sold to the Fund by the investor upon request. Cancellations of the participation in the Fund are also excluded – except in the cases prescribed by law. Cancellations of the participation in the Fund by the Manager are possible under the special circumstances provided for in the limited partnership agreement.

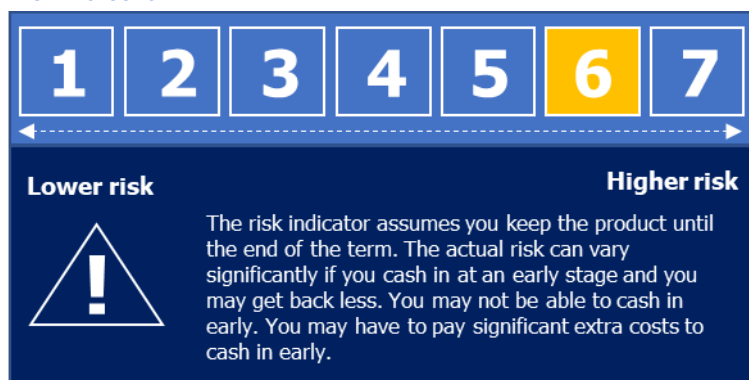

**Objectives:** The objective is to increase the capital invested by the investors during the term of the Fund. To this end, equity and quasi-equity investments in start-up companies are acquired, held and sold. The investment focus lies in the so-called early-stage sector. The Fund invests in portfolio companies with a focus on technology sectors that are active or engaged in Defense, Security, Industrial, Enterprise and Space sectors. The Fund shall conduct investments in Portfolio Companies originating, inter alia, in Germany, Italy, Europe (including the United Kingdom and Switzerland), and the United States, and opportunistically elsewhere. The Fund allows for discretionary choices in regard to investments that are to be made, whereby this approach does not include a reference to a benchmark. Returns that exceed the costs incurred are generally returned to the investors or paid out to the Fund's initiators via carried interest. A portion of the returns (including any dividend income) may be reinvested. The return of the Fund depends on the performance of the investment assets held and the appropriate time of acquisition and disposal.

**Intended retail investor:** Semi-professional investors within the meaning of the German Investment Code (*Kapitalanlagegesetzbuch*). The statutory minimum capital commitment is EUR 200,000. This Fund is suitable for you if you are pursuing the goal of general asset accumulation or asset optimisation and would therefore like to add private equity to your asset portfolio as a high-yield supplement. The Fund is further aimed at investors who have knowledge of, and experience with, private equity funds or venture capital funds, can hold the product for the long term and can cope with a total loss of their investment.

**Further information:** The Fund has no depositary. The limited partnership agreement of the Fund with further information about the Fund and descriptions of the investment strategy and objectives of the Fund can be made available in English by the Manager upon request. The latest annual report of the Fund (if available) can be made available in German by the Manager during reporting to investors and upon request. Further practical information can be made available by the Manager upon request; prices for interests in the Fund are not available.

### What are the risks and what could I get in return?

#### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product in risk class 6 out of 7, which is the second highest risk class. This rates the potential losses from future performance as "high" and poor market conditions are very likely to impact our capacity to pay you.

**Be aware of currency risk. The currency of this Fund may be different from that of your country. As you may receive payments in the currency of this Fund**

**and not that of your country, the final return you get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

The risk indicator does not take into account that key persons may leave the Manager and that the default of other investors may affect the diversification of the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

### What happens if the Manager is unable to pay out?

There is no contractually guaranteed payout. According to the provisions of the limited partnership agreement, investors will participate in the returns generated by the Fund. If the Fund has to file for bankruptcy, losses would be likely for the investors. A default of other companies (general partner or managing limited partner), on the other hand, does not lead directly to financial losses for the investors, but can (temporarily or permanently) impair the Fund's ability to act. A possible loss is not covered by a compensation or security system for investors.

<sup>1</sup> The statutory minimum capital commitment for a semiprofessional investor in the Fund is EUR 200,000. Subscriptions for a lower amount are not permitted. The investment amount of EUR 10,000 assumed in this Key Information Document is required by law in order to make it possible to compare different Key Information Documents for different products. However, this is a purely hypothetical scenario.
